

Experience of Care

Patient testimonials and clinical results have demonstrated that SafeGait[®] supports a faster recovery by enabling more challenging treatments and enhancing patient confidence throughout the recovery process.

Population Health

Community based fall prevention programs have proven effective in reducing falls upward of 35% among older adults. SafeGait[®] facilitates the creation of advanced fall prevention clinics, offering a safe environment for at-risk individuals to strengthen muscles and reactive balance techniques.*

Per Capita Cost

SafeGait[®] reduces per capita expenditure by allowing for a 1:1 clinician to patient relationship during a therapy session. This frees up resources and allows multiple therapist to see more patients.

The IHI Triple Aim

Population Health

Experience of Care

Per Capita Cost

The IHI Triple Aim framework was developed by the Institute for Healthcare Improvement in Boston, Massachusetts (www.ihl.org).

I know I wouldn't be as far along as I am in my recovery if it wasn't for SafeGait. Thank you!

I drive from quite a distance to use this machine. I have made so much progress here. It is definitely worth the drive and I wouldn't go anywhere else for my therapy. This place is amazing!
